

5-I believe in God because of the Scientific foreknowledge of the Bible, His word.

1-The Origin of light:

Sir Isaac Newton, and others, once held the idea that light is an emanation from the sun and other luminous bodies.

2-In recent years scientist think that they have proved that light existed before the sun.

1-Many pseudo-scientists have ridiculed the "old Bible idea that light comes from the sun"

2-Light created first

Genesis 1:2-3.

3-Fourth day the sun, moon, and stars become visible. Genesis 1:14-19.

2-The Suspension of the Earth-Ancient beliefs.....

1-The Greeks and Romans were the most advanced people of their time yet:

1-They believed that the earth was held in place by poles or by the neck of Atlas.

2-Some thought that the earth was afloat in a great cosmic sea and should one go to far out on the sea he would surely fall over the edge and perish.

2-When men sailed around the earth ( Sir Francis Drake 1577-80 ) they discovered that it touches nothing-tha nothing visible holds it in place.

Job 26:7; He hangeth the earth upon nothing.

3-The Great Empty Space in the North:

1-It contains no moving planets and no shining stars.

2-By turning their telescopes to the South, the East and the West, Astronomers may behold countless millions of stars but when the telescope is set exactly to the North there is a great empty space. They did not know this until recently.

Job 26:7;

"He Stretcheth out the north over the empty spaces and hangeth the earth upon nothing"

4-The Number of the stars. 150 B. C. 3000 stars.

Ptolemy held 150 A. D. 3000 stars.

1-Telescope has revealed countless stars. Bible declared that the stars are like the sands-innumerable. Gen.13:16;15:5; Jer.33:22

1- The relation of light to the stars is a subject of great importance. It is a subject which has attracted the attention of philosophers and astronomers from the earliest times. The question of the nature of light and its relation to the stars is one of the most important in the history of science. It is a question which has been discussed by the greatest minds of all ages. The question of the nature of light and its relation to the stars is one of the most important in the history of science. It is a question which has been discussed by the greatest minds of all ages.

2- The question of the nature of light and its relation to the stars is one of the most important in the history of science. It is a question which has been discussed by the greatest minds of all ages. The question of the nature of light and its relation to the stars is one of the most important in the history of science. It is a question which has been discussed by the greatest minds of all ages. The question of the nature of light and its relation to the stars is one of the most important in the history of science. It is a question which has been discussed by the greatest minds of all ages.

3- The question of the nature of light and its relation to the stars is one of the most important in the history of science. It is a question which has been discussed by the greatest minds of all ages. The question of the nature of light and its relation to the stars is one of the most important in the history of science. It is a question which has been discussed by the greatest minds of all ages. The question of the nature of light and its relation to the stars is one of the most important in the history of science. It is a question which has been discussed by the greatest minds of all ages.

5-God Examines Job: Job 38th chapter.

Verse 17;

Have the gates of death been opened unto thee? or hast thou seen the doors of the shadow of death.

1-Millenniums have rolled by and we are still silent.

2-Not one of <sup>us</sup> can pierce beyond the veil of death.

3-The scientist confesses his inability to tell what happens beyond death;

And only the wisdom of the Heavenly Father gives us any idea of life "beyond the valley of the shadow of death".

4-Today:

Many men who think they are very wise are only foolish under the great search-light of God's wisdom.
